# Chapter 1: Introduction-Understanding MLM In GVO Compensation Matrix

MLM stands for Multi-Level Marketing and is a wonderful method of building an online residual income.

The common concept behind MLM is that you sell products and recruit other people underneath you to also sell the same products or services for which you get paid a commission on, and they then can recruit people to do like what you have done to earn a commission.

You probably get the picture by now about how the MLM model works, as illustrated by the following diagram.

The number of people under you (known as downlines) in the MLM program depends mostly on how much effort you have put in recruiting people. The more downlines that you have, then the more income you are going to make.

In GVO, the MLM structure is known as the forced 2 x10 matrix and it is marketing mainly through the internet. By just rebranding this report with your GVO affiliate link and giving it away in social network site like Facebook or Twitter, or even email it to your friend, you can literally see your network marketing income with GVO grow as more people join GVO through your affiliate links embedded in this FREE report and use the services provided by GVO.

You do not need to have an in-depth analysis of the 2 x 10 matrix in GVO but at least you need to understand how the structure in GVO works so that you can maximize your network marketing income while utilising all the great services like hosting, autoresponder, video marketing services etc provided by GVO for your online business.

The matrix, or sometimes called, the forced matrix is like a pre-order tree. A computer server driven plan puts new downline members into your group by computer server, and they go in the next available slot. Usually this plan is combined with some form of a Binary – in GVO's case it's 2 wide, and it does work well if there are a lot of people that are recruited and most importantly -- **working together to fill the matrix**. When you recruit someone, the computer server searches down for the next open slot, and positions them there. **The GVO setup allows you to override the placement of those that you personally sponsor even though they are not positioned directly under you within the tree.**

The advantage here is that every single affiliate in the tree all work together to fill the matrix and the duplication result is incredible! Can you imagine if everyone finds just 2 downlines and everybody repeat that, the matrix will be filled very fast, only 2 new members per month for each, and the matrix will be completed in less than 10 months!

One of the biggest and most obvious disadvantages with this compensation plan is of course that **everybody is waiting for someone to fill the tree for them**, thinking that they will get their income waiting for others to fill it. This kind of thinking **will make the matrix fail miserably**

Furthermore, unless there is a cut off system in the matrix compensation plan, (for example, after the tenth level the person at the highest position will have to reinvest again at the bottom of the tree), the guy who 'came first' will get all the commissions and not do anything. – that is why GVO has decided to cut off at the 10<sup>th</sup> level.

A special feature at GVO is that when you have reached 14 direct referrals, you will get a new **profit position** that you can place anywhere in your downline – and start to build a new 2x10 matrix from there. That will encourage anyone within the matrix to build more downlines.

**REALITY CHECK:** Regardless of how good this matrix compensation plan may sound, it will not make you any money unless you actively recruit anyone into GVO and help them to develop their business in GVO.

**Remember, You are the Key to the riches behind this GVO matrix compensation model.** The matrix compensation model in itself is useless. That is the main reason GVO rewards those who actually work the plan and you will start to receive the full 10 levels of MLM commissions only when you have personally referred 4 people into GVO.

**Do not get too complicated explaining about compensation plans.** Keep it simple while explaining to your prospects and make sure you understand that you CAN MAKE MONEY with it if you work your plan.

**There are 3 ways to make money in GVO's internet network marketing plan.**

**1) The First area is Product Profit.**

You must show the prospect that they can earn a retail profit with your products and services. *GVO pays 50% on direct referrals on the first month.*

**2) The Second Area is Team Overrides.**

This is where, just like a Real Estate broker, or Insurance agency, you get to develop your own sales team. 'Sales Managers' get paid a certain percentage of override from their downline members, just like the Real Estate and Insurance Agents do. Your goal is to help your people to do the same thing and be successful. People don't understand that you have to help people or help your team to succeed first in order to succeed. If they achieve success first, then only will you be successful. *GVO has 20% matching check bonuses on direct referrals 10 levels deep, so if you teach them to be successful, you will be successful*

**3) The Third Area is Leadership Bonuses.**

This is where you help develop Successful leaders in your group, and you get an additional bonus or override from your group. You get rewarded by helping others develop their leadership potential. Once your leaders are in place, your MLM business will go on autopilot. *GVO has monthly leadership bonuses, where 10% of the company's profit is divided amongst the 20 top performers.*

Below are some basic skills that you need to learn in order to benefit from internet marketing.

It is crucial that you register a domain name that is relevant to your business. With GVO Titanium or Host Then Profits membership, you can easily register your domain names with video instructions in the member’s area.

## **Autoresponder**

An autoresponder is a program that sends out email messages automatically at pre-defined intervals. You write a few numbers of emails into your autoresponder and it will send them out over a period of time that you have specified. An autoresponder is a great way to present information to potential prospects and provide training for new recruits.

What you need to do is simply input your autoresponder with the messages and it sends them out 24 hours for you with no involvement in your part. You can also send ad-hoc broadcast messages out to the people on your mailing list. An autoresponder can be described as a combination between a 24/7 mail and sales person.

With GVO membership, you get access to top quality autoresponder service known as Eresponder.
